

# The future of milking is here

The most efficient cluster we've ever developed means more milk and better udder health, with less labour required.

Less than **1 min** to exchange 4 cartridges

**x4** lifetime of short milk tube\*\*

Up to **7%** shorter milking time\*\*

Up to **+9.3%** higher milk-flow\*\*

Up to **83%** less slip\*\*

**x2** lifetime of cartridge\*

Up to **92%** improvement in teat condition scoring\*

\*\* Data from our pilot farms, not contractual.

## DeLaval Evanza™ milking cluster

The new DeLaval Evanza™ milking cluster is our lightest, which means you can milk faster, with less effort\*.

This is the future of milking. Today.

Evanza™ cluster is not just faster, it's also better for your cows, better for your milkers, that may be better for your bottom line. It is quite simply our most advanced cluster, combining 130 years experience in one ground-breaking product.

Put it to work on your farm and turn to the future with Evanza.™

- ✓ Faster to change\*
- ✓ Faster milking\*
- ✓ Improve udder health\*
- ✓ More durable\*

## Taking a 360° view of your farm with Evanza™

**Farm Profitability**  
Evanza may help you achieve a shorter milking time which can mean a capacity boost.

**Work Efficiency**  
With Evanza you may be able to replace liners and tubes in fraction of the time.

**Animal Welfare**  
The use of Evanza can lead to fewer slips and a significant improvement in teat condition.

**Food Safety**  
DeLaval Topflow™ can help you to deliver improved milk flow.

\* Compared to Harmony DeLaval cluster.

## DeLaval Evanza™

A large image of the DeLaval Evanza milking cluster with several callout boxes pointing to its features.

- DeLaval Clover™ cartridge**  
Ground-breaking cartridge construction with incorporated Clover™ design for increased milking performance and lifetime.
- Cartridge eliminates twisted liners**
- Clover Shape**
- DeLaval Turn&Milk™**  
Turn & Milk principle of Evanza™ for effortless and time-saving exchange.
- Durable cups for robustness**
- Top quality materials**
- Short Milk Tube**  
bayonet type attachment
- Lighter for easy handling**
- DeLaval TopFlow™**  
Unique TopFlow™ technology has been shown to help improve milk flow and udder health.

**Ergonomic grips and excellent weight distribution for easier attachment**

\*As compared to our previously developed clusters may vary and are not guaranteed.

FARM LOCATION: **WYELANGTA, VIC**  
HERD SIZE: **420 COWS**

“ The most noticeable thing with the new cluster is the easy attachments.

They milk out fast!

It attaches quickly and stays very well on the udder, therefore there is a lot less slip and squawks.

The teat condition has never been so good. Less mastitis and somatic cell are tracking around 50,000 at the moment.

This is a game-changer.

”

— Hans Vogel

FARM LOCATION: **EKATAHUNA, NZ**  
HERD SIZE: **480 COWS**

“ Being a once a day herd, we needed a cluster that milks the cows well and has no cup slip. We found cup-slip very annoying.

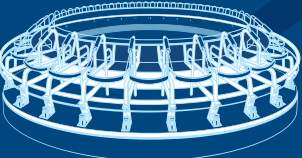

It attaches very well on the udder, therefore a lot less slip and squawks.

”

— Sam Capes
